

Dawnprene TPE 4014-PB

TPE

TPE

Features:
It is a transparent thermoplastic elastomer (TPE) material. This material combines good physical properties, chemical resisittance and elasticity, designed for extrusion applications. This grade of TPE can be processed on conventional thermoplastics equipment for extrusion. It is completely recyclable.

Drying Instructions: Need drying the granules before make molding, excessive moisture will lead materials bad extrusion surface, mechanical performance reduction and bad surface appearance. Moisture content request below 0.1%, suggesting drying as follow process:			
Drying conditions	Drying temperature/		Drying time/h
first choice	70 80		2 3
other choice	90		1
110105			
If drying temperature over than 110 ,it might cause materials blocking in barrel zone; if use moisture analysis meter, the temperture setting should be on 105 .
